WHAT IS

MyBovine.ai?

MyBovine.ai is an intelligent livestock monitoring platform designed to help dairy farmers manage cattle health, fertility, activity, and operations more efficiently.

Using smart wearable devices, cloud connectivity, and AI-powered analytics, we turn real-time data into actionable alerts and insights—right on your phone.

“ Watching your herd
24/7 - so you
don't have to.

Key Benefits

Early Health Alerts

Real-time Monitoring

Heat & Fertility Tracking

Remote Farm Access

Multi-language Support

AI-powered Herd Insights

Smart Notifications

Secure & Reliable Data

THE CHALLENGES IN

Modern Dairy Farming

Every day challenges lead to losses — in productivity, profit and peace of mind.

Missed heat cycles

Delays breeding and reduces productivity

Illnesses detected too late

Problems are noticed only after damage occurs

Heat stress affects yield

Indian summers reduce milk production

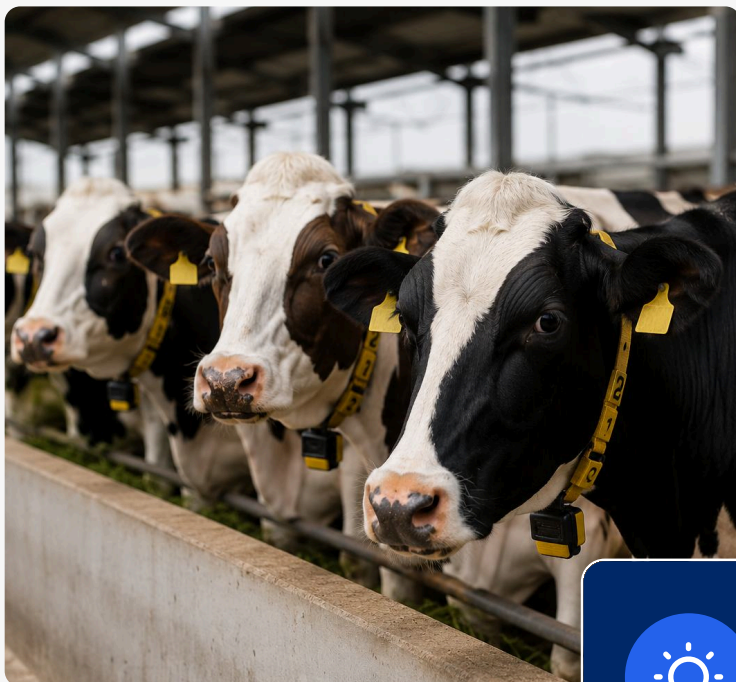

Labour dependency

Skilled herdsmen are scarce and expensive

Risk of theft and loss

Open grazing increases risk of cattle loss

What Farmers Need

- ✓ Real-time herd visibility
- ✓ Early health detection
- ✓ Accurate breeding insights
- ✓ Automated cattle tracking
- ✓ Easy-to-use mobile monitoring
- ✓ Actionable insights instead of raw data

MyBovine.ai transforms livestock monitoring from reactive management into **proactive decision-making**.

How MyBovine.ai Works

A complete livestock intelligence ecosystem that turns data into better decisions.

Smart Collar

Captures activity, motion, temperature & more vital signals 24/7.

Gateway

Collects data via BLE and sends it securely to the cloud.

MyBovine Cloud

Stores, processes and analyzes data using AI & machine learning.

Web & Mobile App

Real-time dashboards, alerts and insights anytime, anywhere.

Built for Real Farm Conditions

Rugged & Weatherproof

Designed for harsh Indian conditions.

Reliable Connectivity

Long-range coverage even in remote areas.

Secure Cloud Infrastructure

Your farm data is safe and private.

Remote Updates & Diagnostics

Always up to date with the latest features.

AI Alerts

Animal Name 12:12 PM
Experiencing heat stress 48°C
Unresolved Ask BovidAI Call Vet

Real-Time Alerts That Matter

Instant notifications for heat, health and unusual activity — so you can act early and prevent losses.

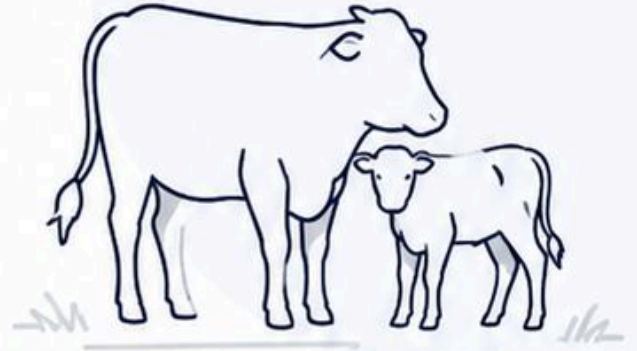

MyBovine.ai

24/7 Monitoring

Across

Six Critical Areas

MyBovine.ai continuously tracks what matters most, so you can focus on growing your farm.

Heat Detection

Detects 90–95% of real heats, including silent and weak heats. Provides the optimal insemination window.

Health Monitoring

Early warning for mastitis, ketosis, metritis, lameness, milk fever and other health issues — before visible symptoms appear.

Calving & Transition

Predicts calving dates, monitors transition periods and helps plan dry-off and post-partum care effectively.

Behaviour Insights

Tracks activity and rumination patterns to understand behaviour changes with precision.

Heat Stress Monitoring

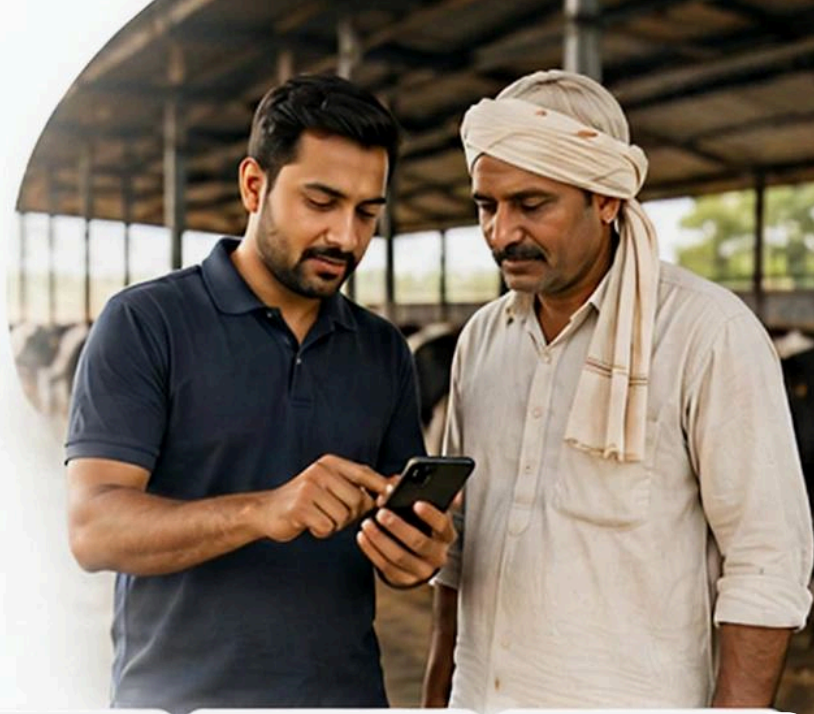

Detects stress behaviour during extreme weather so you can take action before milk yield drops.

Distress Alerts

Identifies abnormal behaviour and potential distress early for faster intervention and better outcomes.

Built for Impact. Proven on Every Farm.

MyBovine.ai empowers farmers to take timely action, improve herd health, increase productivity and boost profitability.

20%+

**Increase in
Conception Rates**

Better heat
detection leads to
higher fertility.

30%+

**Reduction in Health
Losses**

Early detection
helps prevent
major illnesses.

10-15%

**Improvement in Milk
Productivity**

Healthier cows
deliver more,
every day.

50%+

**Time Saved in Daily
Monitoring**

Lower losses.
Better decisions.

Higher

**Overall Farm
Profitability**

Lower losses.
Better decisions.

**Farm-First
Technology**

Designed for Indian
farming conditions.

**AI-Powered
Intelligence**

Advanced algorithms
trained on real-world
dairy data.

**Simple & Easy to
Use**

Built for everyone — from
farmers to farm
managers.

Reliable Support

Dedicated team with
quick and continuous
support.

**Secure &
Scalable**

Your data is safe and
accessible anytime.

“

Since using MyBovine.ai, we no longer miss heats and health issues are caught much earlier. It's like having an expert with us 24/7.

— Progressive Farmer, Maharashtra

From Setup to Smarter Decisions. We're With You Every Step.

A smooth onboarding experience and continuous support to keep your farm ahead.

01

Site Assessment

We understand your farm setup, herd size and requirements.

02

Installation & Configuration

Devices and gateways are installed and configured for seamless connectivity.

03

Training & Onboarding

Hands-on training for you and your team to get started with ease.

05

Ongoing Support & Updates

Continuous support, system updates and farm success partnership.

Ready to Transform Your Dairy Farm?

Join thousands of forward-thinking farmers who trust MyBovine.ai to manage their herds smarter, healthier and more profitably.
